

## TH-701 Nonstop Cleaning and Pretreatment Filming Agent

### Properties:

TH-701 is composed of chelating, detergent, dispersant and pretreatment filming agent. It has properties of fast cleaning, quick filming, film homogeneity, and low corrosion ratio. It is not affected by ferric and copper ions in pretreatment filming, especially suitable to be used in nonstop cleaning of circulating water system.

### Specification:

items	index
Appearance	Amber liquid
Solid content, %	40.0min
Total phosphoric acid acid (as $\text{PO}_4^{3-}$ ) %	20.0min
Density (20°C) $\text{g}/\text{cm}^3$	$1.25 \pm 0.1$
pH (1% water solution)	$2.0 \pm 1.0$

### Usage:

The dosage of 150-250mg/L is preferred.

### Package and Storage:

25kg barrel or confirmed by clients. Storage for one year in room shady and dry place.
